

CURVED WALL SHELF

Brushed Stainless Steel
L80 x W20 x H25 cm

Tool + 3 x Screws (not included)

1.

Wear gloves when handling and assembling the shelf to avoid fingerprints on the untreated surface. Any adhesive residue from the protective film can be removed with white spirit, thinner, or nail polish remover.

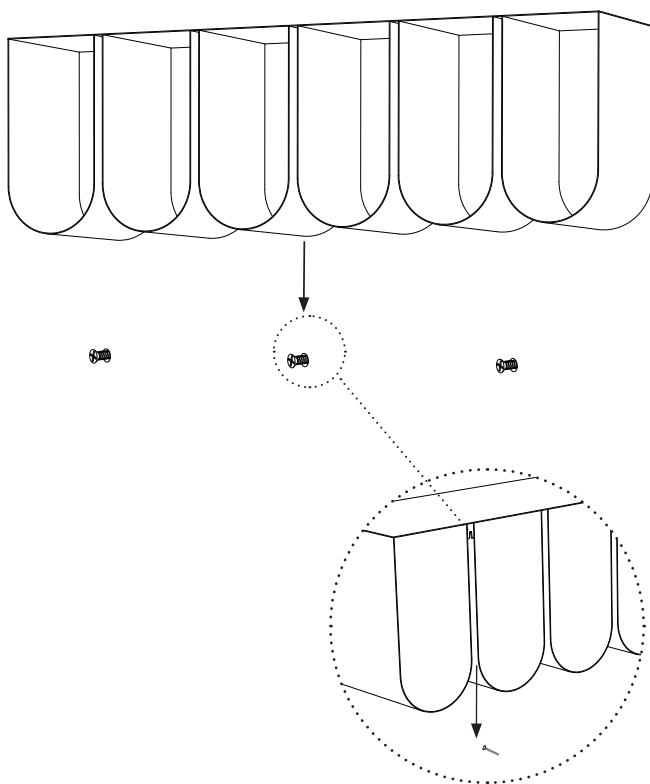

First, measure and mark the distance from the centre of the three mounting brackets.

Screws for the wall are not included because different wall materials require various fixing devices. Use fixing devices suitable for your wall with a total load-bearing of 20 kg. If in doubt, always consult a professional.

Tool + 3 x Screws (not included)

2.

Hang the shelf on the wall by sliding the mounting brackets onto the screws. Be careful not to scratch your wall!

Maximum load capacity 5 kg.
